- Webpack / NPM
- Figma

AI & Automation

- ChatGPT / Grok / Claude Code
- Prompt engineering
- AI video & content generation (Higgsfield)
- Telegram Bot API: aiogram (Python)

Full Stack Developer | AI & Automation

Pavel Prohnov

Full Stack Developer with commercial experience since 2020. I build single-page and multi-page web applications, Telegram bots and automation scripts, and work closely with designers and other teams on integration, documentation and delivery of real projects. I actively use AI tools (ChatGPT, Grok, Claude Code) in development, create AI-generated video and content (Higgsfield), and have experience in traffic arbitrage and promotion on YouTube, TikTok and Facebook. English level: B1.

Work experience

Full Stack Developer NDA

2021 - Present | Ukraine

- Development of single-page and multi-page web applications (front-end and back-end) with React, Next.js, TypeScript, Node.js and MySQL.
- Development of Telegram bots for business tasks (Python, aiogram), including AI integration via the Anthropic API.
- Writing scripts to automate business processes and routine tasks; REST API integrations and deployment with Docker.
- Project details are covered by a non-disclosure agreement.

Traffic Arbitrage NDA

Alongside main work | Ukraine

- Driving organic (shareware / UBT) traffic through YouTube, TikTok and Facebook.
- Creating and promoting video content, including AI-generated video.
- Testing creatives and analysing campaign performance.
